REFRESH YOUR MINDS !

In line with its continuous endeavours towards boosting employees' knowledge, PR Department is pleased to share with you a couple of interesting facts on a weekly basis under the theme of "Refresh Your Mind"!

HUMANS

THE SMARTEST MAN EVER!

William James Sidis (April 1, 1898 – July 17, 1944) was an American child prodigy with exceptional mathematical abilities and a claimed mastery of many languages. After his death, his sister made the unverifiable claim that his IQ was "the very highest that had ever been obtained", but any records of any IQ testing that Sidis actually took have been lost to history. He entered Harvard at age 11 and, as an adult, was claimed to be conversant in over 40 languages and dialects. Although it was later acknowledged that some of the claims made were exaggerations, Sidis is still being referred to - by many parties - as the smartest man who ever lived.

WILD LIFE

GOLIATH BEETLES

The Goliath beetles among the largest insects on Earth, if measured in terms of size, bulk and weight. They can be found in many of Africa's tropical forests, where they feed primarily on tree sap and fruit. Goliath beetles measure from 60 to 110 millimeters for males and 50 to 80 millimeters for females, as adults, and can reach weights of up to 80 to 100 grams in the larval stage, though the adults are only about half this weight. The females range from a dark brown to silky white, but the males are normally brown/white/black or black/white.

TRAVEL DESTINATION

RUSSIA

Did you know that Russia is the largest country by land mass on Earth (17.1 million km²)! Moreover, Moscow, the capital and most populous city of Russia, is one of the world's largest cities.
